Traffic info is great for choosing alt. routes prior to reaching major cities and the further away the information is available the safer and least congested route can be used.*****example***** A truck(with XM Radio) IN ROUTE to NEW YORK CITY traveling thru Richmond Va. at 6am.hears of tanker crash in SPRINGFIELD VA. deverts to hwy 301 avoids traffic all together and is not using local alt. routes creating more congestion. Local people are not using satalite radio for local information. THINK ABOUT IT!!!!!!
